DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 7, line 1, term "the type" is indefinite.

In claims 9 and 10, "said tube stopper" lacks antecedent basis.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 5, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jensen (3,420,585) in view of Wehle et al. (5,320,240).

Jensen discloses, in figs. 3 and 4, a fuel inlet apparatus comprising a fuel fill member 15 having a tubular routing structure 16; a fill cap 17; a chain 22 having one end being fastened to the routing structure and the other end fastened to the cap; a stopper member (the inwardly extension in the routing 16 adjacent to the seal 28).

Jensen does not disclose a protective tube surrounding a portion of the chain.

Art Unit: 3727

Wehle teaches a fuel cap having protective tube 27 surrounding a portion of a chain 28.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a protective tube surround the chain in Jensen, as taught by Wehle, in order to protect the chain from damage.

Examiner notes that the introductory statement of intended use (for a personal watercraft...) has been carefully considered, but deemed not to impose any structural limitations on the claims distinguishable over the fuel inlet apparatus of Jensen in view of Wehle et al.. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Allowable Subject Matter

5. Claims 2-4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LIEN TM NGO whose telephone number is 571-272-4545. The examiner can normally be reached on Monday through Friday from 8:30 AM -6:00 PM.
